Want FREE condoms?

Abstinence is still the best way to prevent STIs and pregnancy. But other forms of birth control and contraceptives are available at your local medical clinic.

What other forms of protection are available?

③

Nobody wants an STI. And unless you're ready to be a parent ... condoms are an easy way to prevent STIs or an unplanned pregnancy.

Are you aware of all possible outcomes?

②

Don't assume that your partner is ready for sex. If they're not, that's ok!

Are you ready for sex?

①

What's more

AWKWARD?

Talking with your partner about using condoms?
Or talking with your partner about sexually transmitted infections (STIs) ... or even an unplanned pregnancy?
Stay safe-sex smart by asking your partner the questions on the back.
